ERS-507

P/N: 045-0045

For Professional Use Only

PRODUCT DESCRIPTION:

ERS-507 is a proven performer in Ecology Roof Systems' product line. Formulated with a high percentage of SBS (Styrene Butadiene Styrene) elastomeric polymers blended with specially selected asphalts, the resulting waterproofing compound has a rubber-like elasticity capable of taking on conditions of extreme roof stress. The membrane is reinforced with a heavy-duty, non-woven, needle-punched, polyester fabric giving it superior toughness and puncture resistance, which is superior to conventional built-up roofing. The formulation and polyester reinforcement assure membrane flexibility at all temperatures, including those 0°F.

RECOMMENDED USES:

ERS-507, with its sand finish on top and bottom, allows it to be used in systems where surfacing other than granule is desired. Special formulations are also available with SEBS (Styrene Ethylene/Butylene Styrene) polymers designed to add additional ultraviolet protection.
